Integrated cold and compression, all in one powerful system

The Game Ready System takes RICE (Rest-Ice-Compression-Elevation) to the next level by integrating active cold and intermittent compression therapies with greater adjustability, precision, and convenience than ever before.

Active Cryotherapy.

Rapidly circulating ice water continuously, consistently, and comfortably cools the affected site to effectively reduce oedema, muscle spasms, and pain.

Intermittent Compression.

Pneumatic compression mimics natural muscle contractions to gently pump away oedema and stimulate the flow of oxygenated blood.

Circumferential Coverage.

Anatomically designed wraps surround the affected body part, increasing surface area and contact for more effective cryotherapy.
